

Conveniently and worry-free with **AppOn.cloud**

Microsoft 365 is a cloud service provided by Microsoft that allows you to use professional Microsoft products without having to operate your own servers to run them or own the product licenses.

With Microsoft 365, your advanced email requirements can be addressed (Exchange) with a 50 GB mailbox per user, corporate voice communication, instant messaging, or shared data storage (OneDrive). A great advantage of Microsoft 365 is the possibility to use technologies that are very expensive to own in companies where investing in these technologies would be unprofitable. Payments for using the products are made monthly, which is a great benefit for companies with fluctuating staff numbers. In the event of staff changes, the number of licenses operated can be adjusted each month according to the company's current needs.

Why use Microsoft 365

- 99.9% uptime guarantee with technical support
- 100% security and constant data backup
- Possibility of data archiving
- Operational increase or decrease in the number of licenses
- Significant reduction in corporate communication costs
- Desktop Microsoft 365 for up to 5 devices

• You can start from **CZK 70 per month**
