

AppOn.cloud

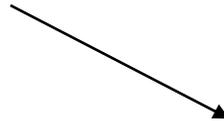

# Manual for connecting to the service AppOn.cloud using the TSPlus client

For MacOS

# 1. DOWNLOAD THE "Microsoft Remote Desktop" APP from the AppStore

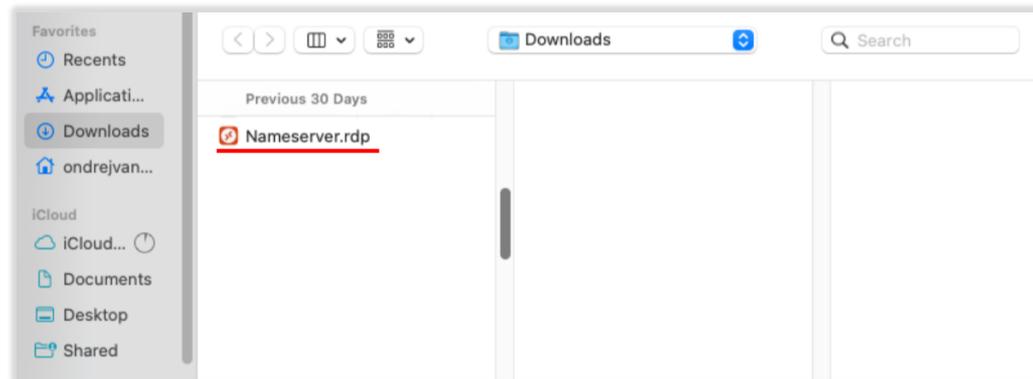

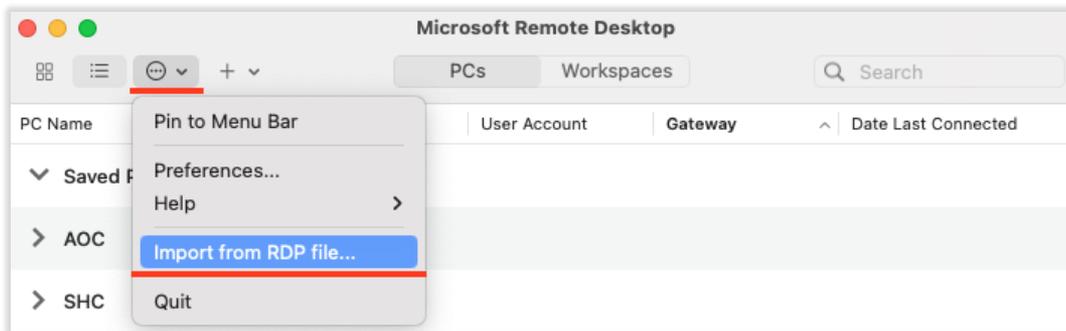

📱 Install the "Microsoft Remote Desktop" app on your MacBook from the AppStore and pin a link to it to the bar.

Microsoft Remote Desktop

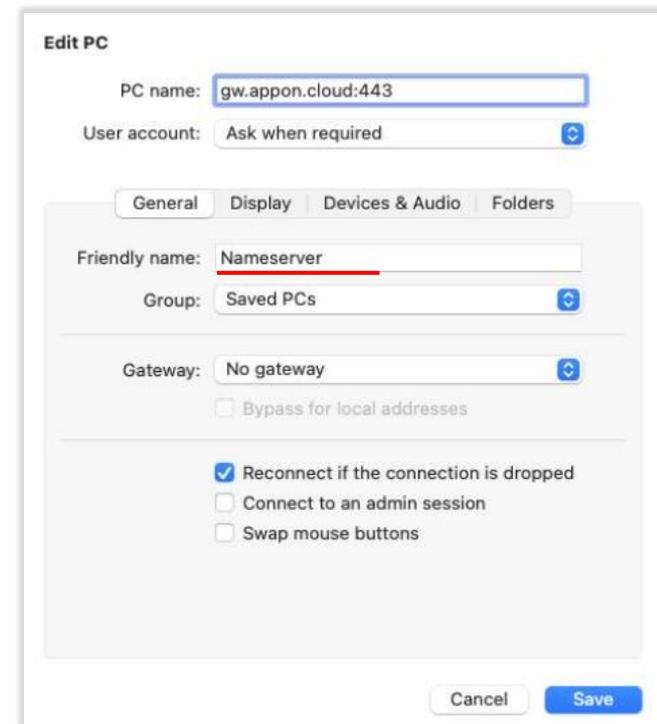

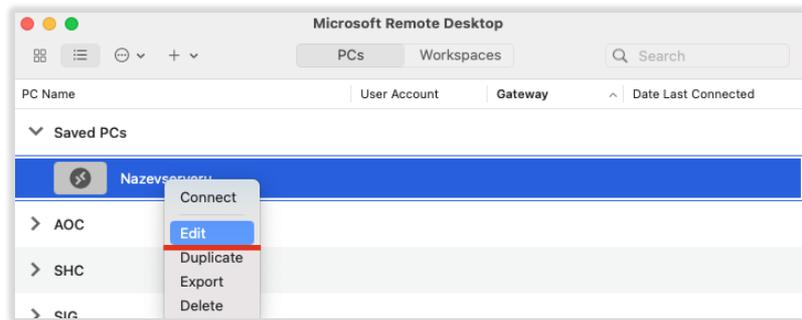

## 2. IMPORT .RDP FILE

Now run the application and import the file called **Nameserver.rdp** that you received in the email from technical support.

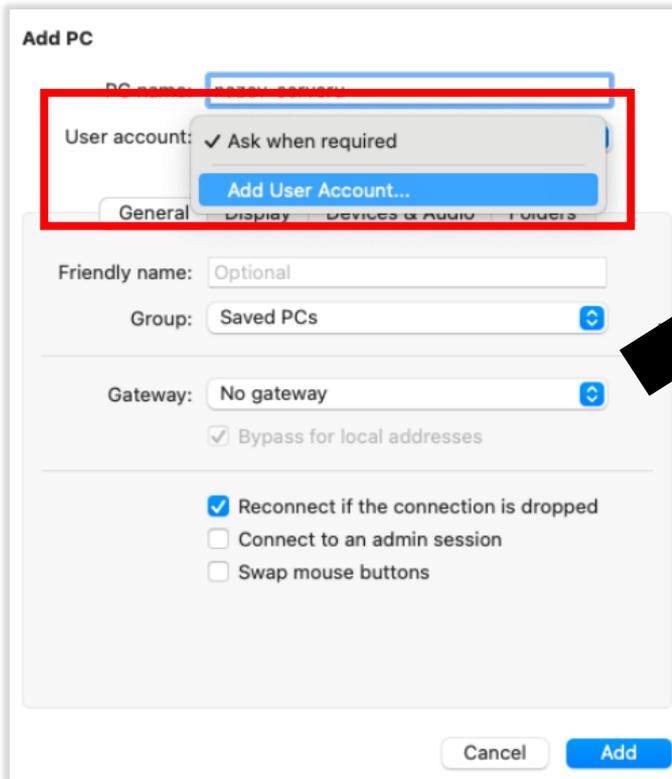

### 3. ACCESS EDITING

 Right-click on the imported file and select EDIT:

 Rename the **Friendly name** to your company name, or whatever you want the connection to be called.

## 4. ADDING A USER

**Add PC**

PC name:

User account:  **Add User Account...**

General | Display | Devices & Audio | Ports

Friendly name:

Group:

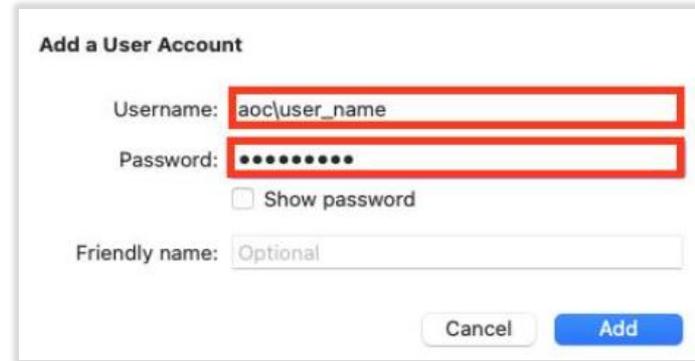

Gateway:

Bypass for local addresses

Reconnect if the connection is dropped

Connect to an admin session

Swap mouse buttons

**Add a User Account**

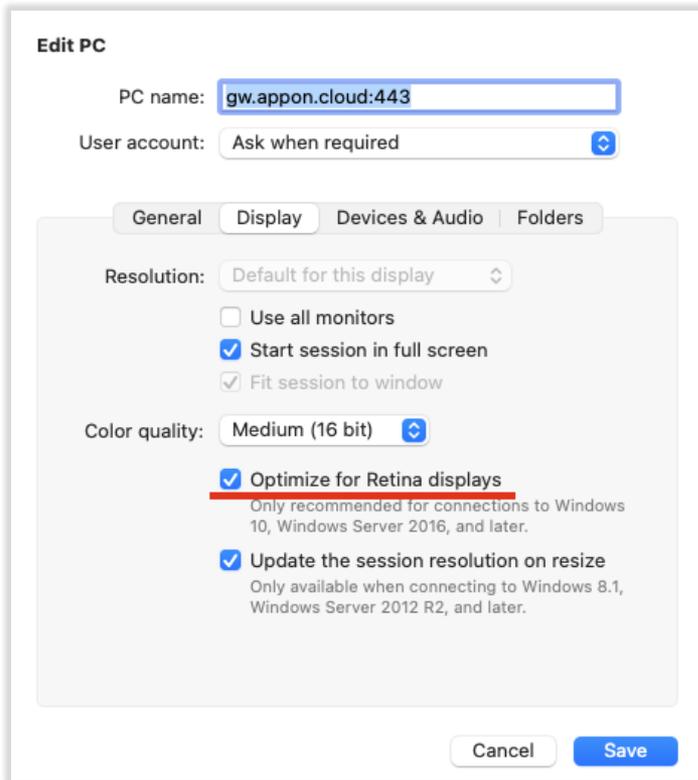

Username:

Password:   Show password

Friendly name:

-  In the **"User Account"** line, select **"Add User Account"**.
-  Then fill in the username you received in the email, which starts with **"AOC\..."**, and the password.
-  You can fill in any username in the **Friendly name** field (not required).
-  Confirm by pressing the **"Add"** button.

## 5. SCREEN SETTINGS

**Edit PC**

PC name:

User account:

General | **Display** | Devices & Audio | Folders

Resolution:

Use all monitors

Start session in full screen

Fit session to window

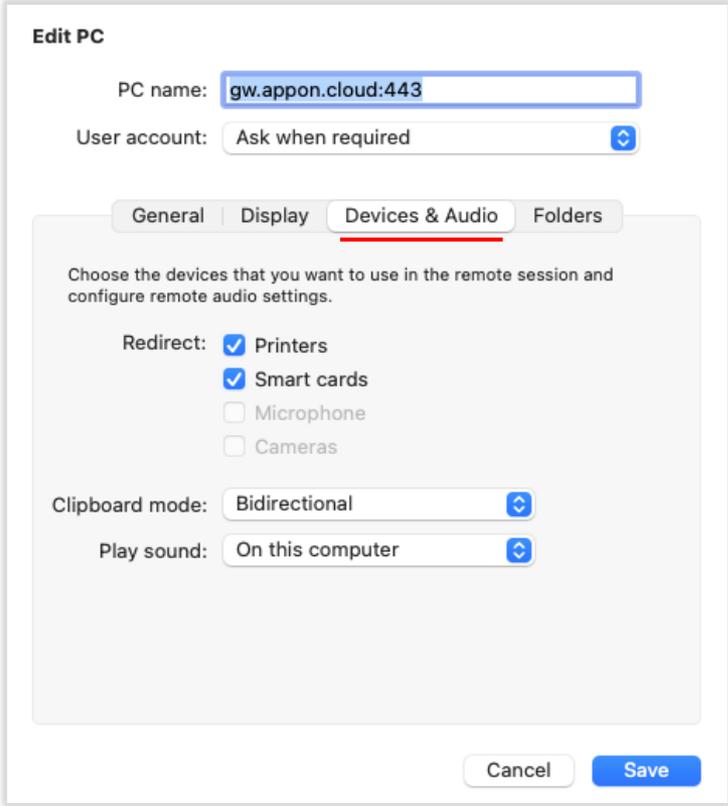

Color quality:

**Optimize for Retina displays**  
Only recommended for connections to Windows 10, Windows Server 2016, and later.

Update the session resolution on resize  
Only available when connecting to Windows 8.1, Windows Server 2012 R2, and later.

- Switch to the Display tab to set the screen correctly.
- Check the Optimize for Retina displays option.
- This is especially useful if you are setting up an external monitor.
- Save by confirming the "Save" button

## 6. PRINT SETTINGS

**Edit PC**

PC name: gw.appon.cloud:443

User account: Ask when required

General | Display | **Devices & Audio** | Folders

Choose the devices that you want to use in the remote session and configure remote audio settings.

Redirect:  Printers  
 Smart cards  
 Microphone  
 Cameras

Clipboard mode: Bidirectional

Play sound: On this computer

Cancel Save

You can conveniently set up remote desktop printing on your local printer in the "**Devices & Audio**" bar by checking the Printers checkbox.

Save by confirming the "Save" button

The last tab, **Folders**, is used to transfer files your local location to the remote desktop.

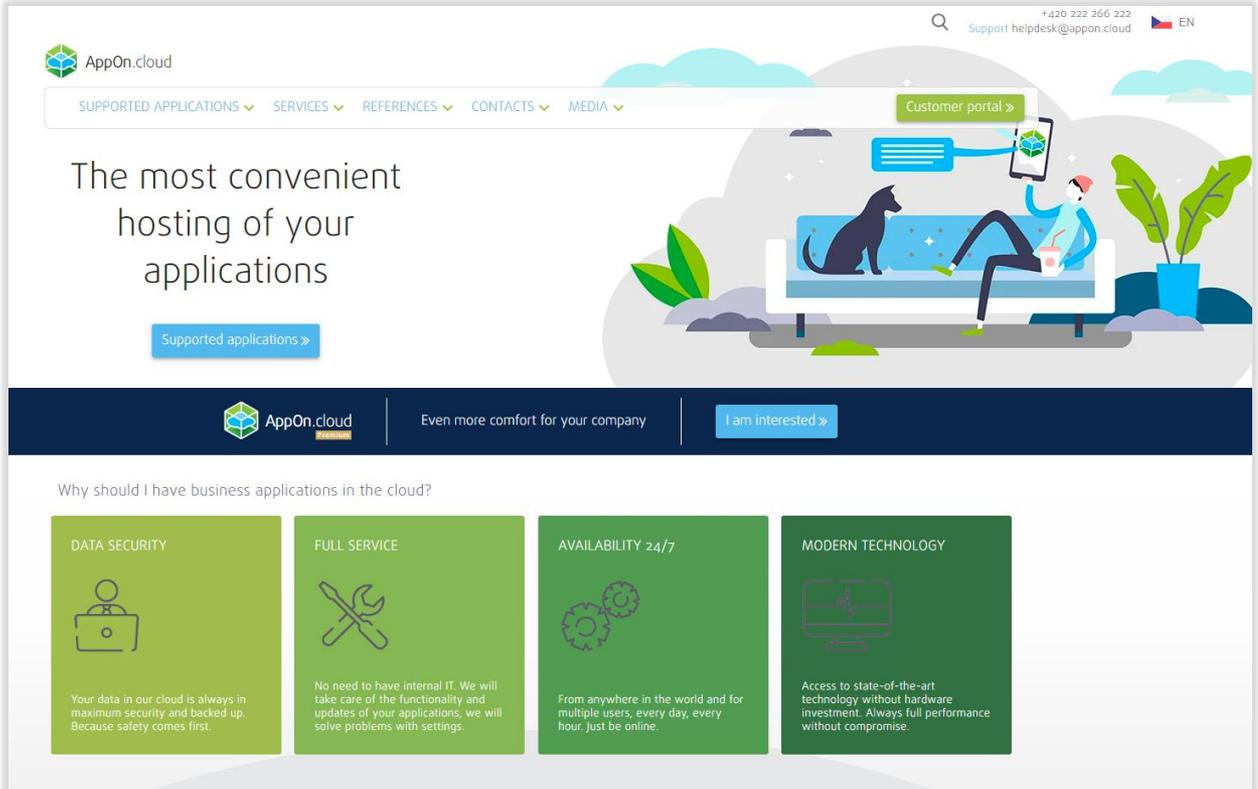

The connection setup for MAC devices is now complete.

If you are not sure about anything, you can contact our technical support at the following contacts:

 [www.appon.cloud](http://www.appon.cloud)

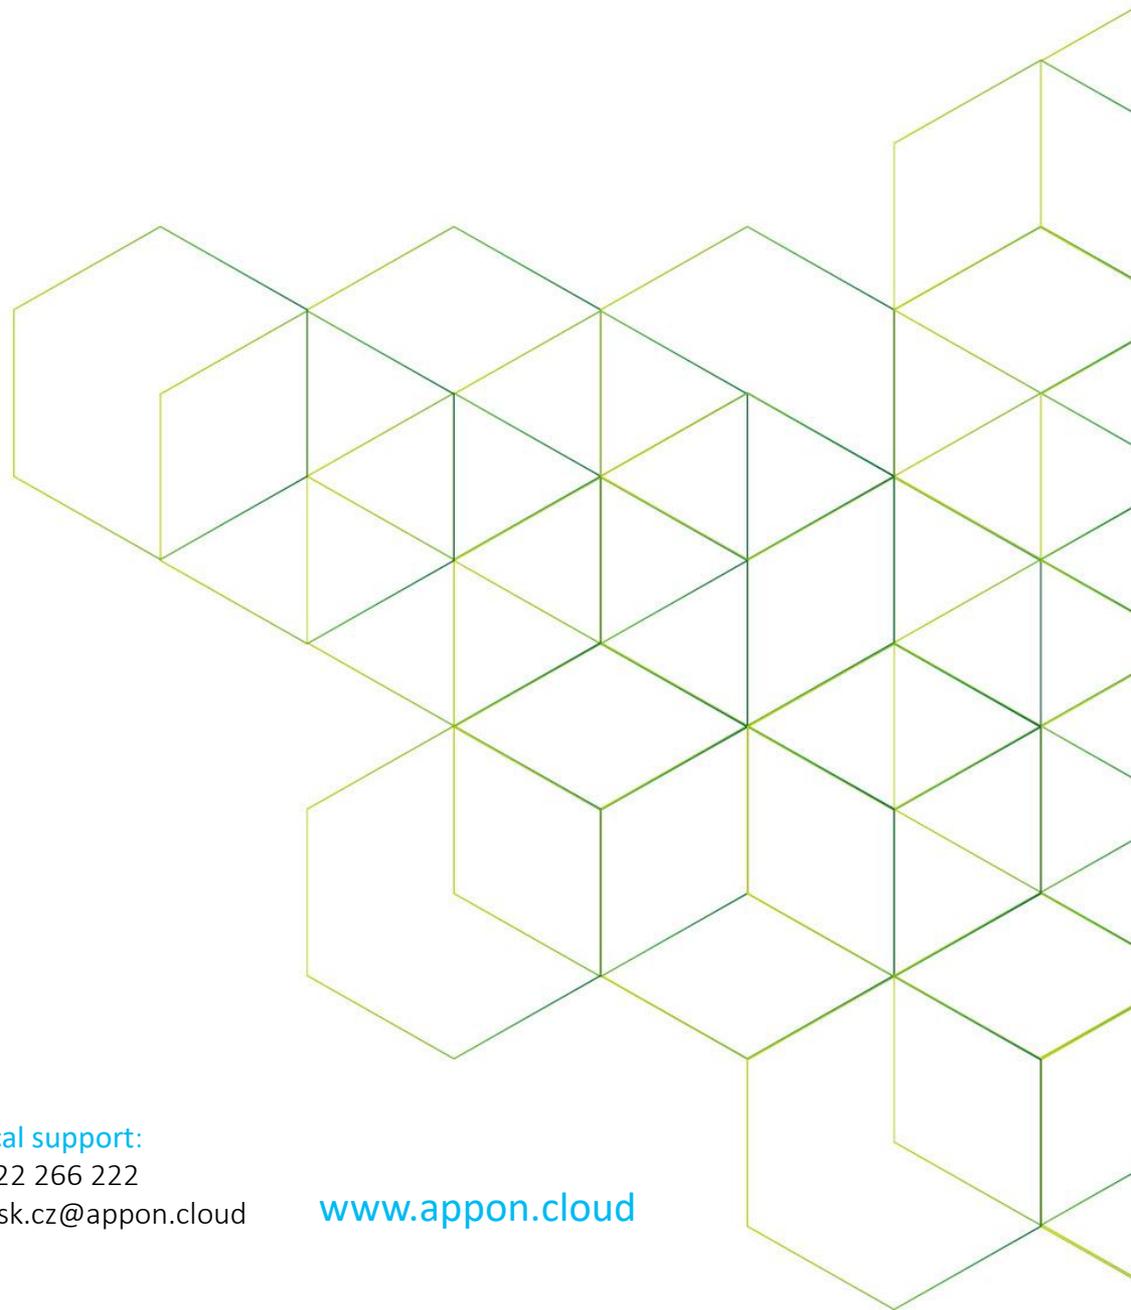

The screenshot shows the AppOn.cloud website homepage. At the top right, there is a search icon, the phone number +420 222 266 222, the email address Support helpdesk@appon.cloud, and a language selector for EN. The main navigation menu includes SUPPORTED APPLICATIONS, SERVICES, REFERENCES, CONTACTS, and MEDIA. A 'Customer portal' button is also visible. The main headline reads 'The most convenient hosting of your applications' with a 'Supported applications' button below it. An illustration shows a person sitting on a sofa with a dog, holding a smartphone. A dark blue footer contains the AppOn.cloud logo, the tagline 'Even more comfort for your company', and an 'I am interested' button. Below the footer, a section titled 'Why should I have business applications in the cloud?' features four green boxes with icons and text:

- DATA SECURITY**: Your data in our cloud is always in maximum security and backed up. Because safety comes first.
- FULL SERVICE**: No need to have internal IT. We will take care of the functionality and updates of your applications, we will solve problems with settings.
- AVAILABILITY 24/7**: From anywhere in the world and for multiple users, every day, every hour. Just be online.
- MODERN TECHNOLOGY**: Access to state-of-the-art technology without hardware investment. Always full performance without compromise.
